### Key Benefits

- ▶ Enables tiered storage, cold archive, pay-as-you-go cloud pricing, which helps lower total cost of ownership
- ▶ Enables retirement of legacy applications and infrastructure tied just to data access, freeing up IT resources.
- ▶ The platform provides policy-based retention, legal hold, metadata tagging, sensitive data discovery and audit trails; all critical for regulatory/litigation readiness (e.g., GDPR, HIPAA, SOX).
- ▶ Data encrypted at rest & in transit (AES 256-bit) and role-based access controls integrated with directory/SSO systems; safeguarding archived content from unauthorized
